Welcome to your Benito Appliances

Congratulations on your purchase of Benito mixer grinder jars! Crafted with precision and quality, these jars are built for optimal performance and durability. Designed to be compatible with most mixer grinders featuring a 4-teeth coupler and dual locking system, they are perfect for preparing chutneys, smoothie, juices, and spice blends.

For best results, always fill the jar slightly below its maximum capacity. Leaving some free space allows proper movement of ingredients during grinding, prevents overloading the motor, and ensures a smoother, more efficient blend every time. From everyday chutneys to occasional juice or spice grinding, Benito jars make your kitchen tasks easier, faster, and more efficient.

How to use your Mixer Jar:

- **Check Compatibility:** – Make sure your mixer grinder is compatible with Benito jars. These jars are designed to work with mixer grinders that have a 4-teeth coupler and a dual locking system. Using an incompatible machine may lead to improper functioning or damage.
- **Load Ingredients:** – Add your ingredients into the jar. For best results, always keep the quantity below the maximum capacity, leaving some space for proper circulation and smooth grinding.
- **Secure the Lid:** – Place the lid securely on top. Ensure it clicks into place to avoid any spills during blending.
- **Grinding:** – Attach the jar to your mixer grinder, select the appropriate speed, and blend until you achieve your desired consistency.
- **Serving:** – Carefully remove the jar from the mixer grinder and enjoy your freshly made chutney!

Precautions to Consider:

- **Compatibility Check:** – Always verify that your mixer grinder is compatible with Benito jars to prevent any mishaps.
- **Avoid Overloading:** – Exceeding the jar's capacity, as this can cause strain on the grinder and affect performance.
- **Stainless Steel Blades:** – Perfect for both wet and dry grinding, be careful while washing or cleaning the product.

Cleaning instructions:

To ensure long-lasting performance and hygiene of your Benito mixer Jar, follow these recommended cleaning steps: –

- **Hand wash recommended:** – Always wash the jar using mild liquid soap and warm water. Avoid dishwashers or boiling water, as excessive heat may affect the plastic components or jar seals.
- **Use non-abrasive materials:** – Use a soft sponge or cloth. Do not use steel wool or harsh Scrubbers, which can scratch the stainless steel or transparent surface.
- **Rinse immediately after use:** – Do not let food residues dry inside the jar. Rinse right after use to prevent stains, odors.
- **Blade Safety First:** – Blades are sharp. Clean them carefully from the side using a brush or soft cloth — never touch the edges directly.
- **Avoid Soaking the Base:** – Do not submerge the bottom part (especially around the coupler) in Water. Wipe it with a damp cloth if needed.
- **Dry Immediately:** – Thoroughly dry the jar and lid after washing to prevent rust, water Spots, and maintain clarity and shine.

Quality and Specifications

All Benito jars are crafted using premium materials for performance and durability. Each jar is designed to serve a specific purpose — whether it's chutney making, juicing, or grinding — while ensuring a leak-proof, efficient experience.
